

ENVIRONMENTAL POLICY

Smart Environmental Limited (SMART) acknowledges Environmental responsibilities ranking equally with other business objectives, taking into account plant location and design, process and discharge control.

SMART is committed to conducting our business in compliance with applicable laws and regulations.

Officers, Workers and Contractors will be expected at all times to carry out their responsibilities in accordance with the spirit and intent of this Policy.

To fulfill this Policy, SMART as the Person Conducting Business or Undertaking (PCBU) will amongst other efforts:

- Monitor the impacts that SMART has on its workers, contractors, others and the environment through a dedicated program.
- Adopt a proactive and systematic approach to continuous improvement through risk based Management and the ISO 14001 Environmental Management system.
- Implement training and awareness programmes to secure the commitment, participation, and ownership of environmental initiatives by all employees.
- Address the minimisation of emissions and waste generated by the Company's activities through research into and development of recycling processes, cleaner production techniques, and efficient utilization of raw materials through efficient logistics and operations.
- Purchasing of all new vehicles will meet or exceed Euro 5 standards for both noise and emissions. Only diesel and hybrid vehicles will be purchased.
- Afford Environmental Management as a central business activity.
- Work together with other PCBUs in a spirit of trust and co-operation towards optimum environmental results.
- Allocate resources towards the most appropriate environmental technology.
- Include environmental considerations in the planning of all new and existing projects.
- Ensure that contracted services provided to SMART are delivered in a manner consistent with this Environmental Policy.
- Review regularly the Environmental performance of our operations and seek opportunities for improvement.

Blair Griffiths

Chief Operating Officer
